# General Farm Supply Thanks our Farmers!

As your feed and seed professionals we know the importance of quality products for our local farmers and producers.

We thank you for your support, loyalty and business, and hope all families are staying healthy during this time.

In honor of June Dairy Month, we are having our annual ice cream promotion!

Don't forget to bring your coupon to the Marshfield store or Spencer Mill to receive your free bucket of ice cream!

Only with purchase of four Crystalyx tubs or 500lbs of floor stock feeds and minerals

---

## DID YOU KNOW??

1. There are roughly 350 “squirts” in a gallon of milk
2. Dairy cows can produce 125 pounds of saliva in a single day.
3. Before milking machines were invented in 1894, farmers could only milk about 6 cows per hour.
4. The first cow in America arrived in the Jamestown colony in 1611

GOT HOT COWS?

# Chill... With I.C.E.® Premix

## INTERNAL. COOLING. ELEMENTS.

I.C.E.® consists of a combination of key ingredients to help animals stay hydrated.

Then elements of I.C.E.® work at the cellular level of dairy and beef cattle to maintain proteins that are sensitive to body temperature changes.

## HYDRATION IS KEY TO PRODUCTION

U.S. beef and dairy industries lose an estimated \$1.2 billion annually due to heat stress.

## HEAT STRESSED DRY COWS IMPACT YOUR FUTURE

“While not near as obvious, the financial impact of heat stress on dry cows and future heifers is just as real”

-Allan Chestnut PhD, PAS

Visit our website for full article!

### Symptoms of Ruminants Experiencing Heat Stress:

1. Eat Less
2. Pant More
3. Stand More
4. Decrease in milk
5. Increase in health disorders

### Ways to Reduce Heat Stress:

- ✓ Always provide clean drinking water
- ✓ Use fans and sprinklers
- ✓ Make sure animals are cooled in crowded area
- ✓ **For best results, feed I.C.E.® prior to heat stress conditions**
